TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML/CSS, TypeScript

Frameworks: React, Node.js, Flask, Vue.js, React Native

Databases: PostgreSQL, MySQL, Firebase, Apache Cassandra

Developer Tools: Git, Docker, Amazon Web Services, Google Cloud Platform, Terraform

Libraries: Pandas, NumPy, Matplotlib

EXPERIENCE

Scotiabank

Toronto, ON

Senior Software Engineer

Mar. 2026 – Present

- Developed and maintained an internal DevOps web application enabling the creation of CI/CD pipelines for applications' builds and deployments across the bank, serving over 100 teams. Working closely with **Java**, **Spring**, **Argo CD**, **Argo Workflows**, and **GitHub Actions** as a member of the Platform Modernization team.
- Developed the Production Deployment Approval System (PDAS) into CI/CD pipelines, automating security approval checks via Jira-based workflows and ETL processes to streamline production deployments and reduce manual intervention.

Software Engineer

Jan. 2022 – Feb. 2026

- Implemented integral features to add new functionality to the DevOps application and improved user interface and experience using **React** and **TypeScript**.
- Integrated static analysis and security tools such as **Checkmarx**, **Black Duck**, **Fortify**, and **SonarQube** into CI/CD pipelines, enabling early detection of vulnerabilities and code quality issues, and improving overall software security posture and compliance.

Blackberry QNX

Mississauga, ON

Cloud Developer Co-op

May 2021 – Aug. 2021

- Completed proof of concept by developing producers and consumers in **Python** and comparing **Apache Kafka** functionalities to **AWS Kinesis**.
- Developed **Flask** applications to fetch and display live vehicle data from **AWS Keyspaces** using an intuitive UI.
- Developed **AWS Lambda** functions to feed and fetch data to and from **AWS Keyspaces** and integrated Lambda functions with **AWS API Gateway** to deploy REST APIs with descriptive response bodies and appropriate status codes.

RBC Global Asset Management

Toronto, ON

DevOps Engineer Co-op

May 2020 – Aug. 2020

- Developed APIs with OAuth 2.0 Authorization using **Spring Boot** and corresponding API test cases for unit testing.
- Improved reliability and efficiency of asset management applications by incorporating smoke and integration tests written in **Java** within CI/CD pipeline.
- Proposed and developed automated test scripts using **Robot Framework**, **Selenium** and **ReadyAPI**.

Royal Bank of Canada

Toronto, ON

Software Developer Co-op

Sep. 2019 – Dec. 2019

- Developed **Python** scripts using REST APIs for real-time data collection to resolve audit-related issues.
- Developed automated test scripts in **Python** using Selenium WebDriver for various DevOps tools.

Global Affairs Canada

Ottawa, ON

Software Test Engineer Co-op

May 2018 – Aug. 2018

- Developed automated detailed test cases in **Java** based on requirements, design documents, and user stories.
- Conducted risk analysis and identified critical test areas to ensure maximum test coverage.

PROJECTS

Stock Market Analysis

- Developed a Python script that sends text messages to indicate real-time buying and selling opportunities in the stock market using the Nasdaq API.

Automated Stock Portfolio Trade Updater

- Developed an application that extracts stock trade data from email notifications, updates Google Sheets portfolio with new trades, and manages trade records using Python, Gmail IMAP, and Google Sheets API.

Stock Market ETF Investing Bot

- Developed an automated investing bot using Selenium that invests in ETFs on a bi-weekly basis following the Dollar Cost Average investing technique.

EDUCATION

University of Ottawa

Ottawa, ON

Bachelor of Applied Science in Software Engineering (Graduated with Great Distinction)

Sep. 2018 – Dec. 2021
